

*Paramecium bursaria* (Ehrenberg, 1831) Focke, 1836

**NBRP ID:** PB031010B

**Strain:** Yad1g1N

**Syngen and mating type:** Syngen 3, Mt I

**Collected location and date:** Yamaguchi-city Yamaguchi pref, Japan, 2004

**Chain of custody:** NBRP ← M. Fujishima

**Biosafety level:** 1

**Product format:** tube culture

**Other characters:** Original algae were replaced with *Chlorella variabilis* 1N

**Publications:**
